Bosch Global Supplier Award for Rehm Thermal Systems

Networked intelligence is an indispensable prerequisite for Bosch in meeting the demand for quality, cost and innovation. Cooperation with reliable suppliers is of particular importance. For excellent performance, Rehm Thermal Systems has recently awarded the "Bosch Global Supplier Award 2015" in the "Indirect Purchasing" category by the Robert Bosch GmbH. The Swabian machine builder has been supplying the Bosch Group with efficient thermal system solutions for 23 years, including reflow soldering systems, dryers and many special facilities. Overall, Bosch has awarded 58 suppliers from eleven countries.

The award ceremony on July 16, 2015 was held under the motto "Power of Partnership - Connected Intelligence". With this award, Bosch recognizes outstanding performance in the production and delivery of products or services – in particular in the areas of quality, cost, logistics and innovation. "With the 'Bosch Global Supplier Award' we honor our best suppliers, who contribute significantly to the success of the Bosch" said Dr. Volkmar Denner, Chairman of the Bosch board of management, at the award ceremony in Stuttgart. "When designing the networked world our suppliers are important partners. Together with them we want to develop use-generating solutions for our customers". The Global Supplier Award was presented this year for the 14th time.

"For many years Bosch and Rehm have been developing a reliable and cooperative business relationship that has grown internationally and is now established worldwide. Together we have been able to realize many projects and interesting special solutions. Quality and service are an important foundation for a successful partnership for us. We thank Bosch for their trust and our employees for their commitment", said Johannes Rehm, CEO of Rehm Thermal Systems (www.rehm-group.com).

Information on the Bosch Group

In 2014, the purchasing volume of the Bosch Group was around 25 billion euros. Europe is the strong point, representing about 60 percent of global purchase volume. Outside Europe, Bosch is especially involved with China, the US and Japan. The main purchases are production materials such as turned parts, electronic components, plastic parts, and stamped, drawn and bent parts. The extended product offering also includes merchandise, equipment, services and capital goods. In emerging markets such as China, cooperation with local suppliers is an important factor for the success and further growth of the Bosch Group.

Portrait

Rehm Thermal Systems was founded in 1990 by Johannes Rehm and is a provider of reflow soldering systems with convection, condensation or vacuum, drying and coating systems and functional testing systems for the electronics industry as well as a manufacturer of equipment for the metallization of solar cells. With Simply. More. Ideas. our goal is to become technological leaders in all areas of production and offer our customers sustainable, future-oriented products. That means we aim to be more innovative, more reliable and more efficient than our competitors and also offer our customers the best possible options in terms of cost-benefit ratios.
